Bagus Rizki Setiawan

Software Developer

Yogyakarta, Indonesia   bagus30122002@gmail.com   +62 856 0920 1388   in/bagusrizkii/

Summary

As an experienced mobile development engineer, I possess extensive experience and expertise in creating innovative mobile applications. With a strong foundation in software engineering, I have contributed to the development of various applications.

In addition to my technical skills, I have strong problem-solving abilities to tackle challenges and issues. I can quickly adapt to emerging technologies. My enthusiasm for continuous learning and staying up-to-date with the latest developments in mobile development enables me to drive innovation in any team or project.

Experience

Trainee Mobile App Development at Digitalent

Mey 2024 – Juny 2024

- During this program, I learned how to develop mobile applications using JavaScript and React Native. This included applying technology effectively and gaining a strong understanding of user needs.

Trainee Junior Mobile Programmer at Digitalent

January 2024 - January 2024

- The application development process began with designing the UI using XML and mastering programming logic. I developed a notes application that can record data using SQLite with Kotlin and completed certification directly tested by the LSP Teknologi Digital.

Mobile Development Cohort at Bangkit Academy

July 2023 - December 2023

- I have developed a deep understanding in the field of mobile development. Throughout my academic journey and training at Bangkit Academy, I have acquired technical skills and practical experience that have strengthened my foundation in software development, particularly in the mobile domain. During this program, I gained profound insights into best practices in mobile software development, including the application of cutting-edge technology and a strong understanding of user needs.

Assistant Lecturer at Universitas Alma Ata

July 2023 - December 2023

- I assisted in practical sessions for a web programming course, covering the basics of web development such as HTML, CSS, JS, PHP, and Bootstrap. I also guided students in creating responsive websites and helped in reporting their results.

Web Programming di FR Academy
October 2019 - December 2019
- As a web developer, I have learned about web programming languages such as HTML, CSS, JS, PHP, and MySQL, and I have also delved into Bootstrap to help create responsive website designs. I am responsible for creating engaging and efficient user experiences.

Project

stunting cheker
Unniversitas Alma Ata
April 2023 - May 2023
- I designed a system for stunting classification using a dataset from Kaggle and implemented the Naive Bayes method.

Aplikasi LawMate
Bangkit Academy
November 2023 - December 2023
- I designed a legal complaint application using Kotlin. This involved creating the UI with XML, integrating APIs using Retrofit for use in the UI, and building the final application.

The student admission decision support system uses the SAW method
Unniversitas Alma Ata
March 2023 - April 2023
- I developed a system to determine student admissions for a school. I designed the database and implemented the calculations using PHP. Additionally, I created the website interface to be accessible on the internet.

Certification

Mobile Development
Bangkit Academy, December 2023 - December 2026

Junior Mobile Programmer (Vocation School Graduate Academy)
Digitalent, January 2024 - January 2027

Aplikasi Android Intermediate
Dicoding, October 2023 - October 2026

React Course
Progate, April 2024 - April 2027

Junior Mobile Programmer
Badan Nasional Sertifikasi Profesi, February 2024 - February 2027

Organitation

Staff Divisi Diklat
HIMATIK UAA
January 2022 - January 2024
● Participate in designing events that can develop students' skills in the world of coding

Skill

Website
PHP, MySQL, HTML, Bootstrap, CSS Frameworks, JavaScript, React.js, Node.js

Mobile
Kotlin, SQLite, Android SDK, Android Studio, Android Development, React Native

Achievement

2nd Web Technology
LKS Lampung Tengah, 2020
